Families in Virginia Have Had to Spend $3,900+ More Under Trump

As of September 2026, the average household in Virginia has had to **pay an additional $3,900+ for goods and services** due to rising costs under President Trump. Despite repeated pledges on the campaign trail that his administration would "end inflation" and bring down costs for families, Trump and Republicans in Congress have instead pushed prices even higher, including through Trump's reckless tariffs and war in Iran. Below are calculations from the Joint Economic Committee – Minority and other statistics on higher costs that families in Virginia face for everyday essentials:

Housing Costs

- Virginia families have had to spend an additional **$815 on housing costs** such as rent and mortgage payments since President Trump took office.

Grocery Costs

- Americans paid an additional **$310 for groceries** in President Trump's first year than in 2024, and grocery prices are now **more than 4 percent higher** than when Trump took office.
- Beef and coffee prices are hitting Americans especially hard. Since the President took office, the average price of ground beef has risen almost every month to a record high of more than **$7 per pound**. Coffee prices also spiked and are now more than **$9 per pound**.

Energy Costs

- Gas prices have soared since the start of Trump's Iran War. In total, people across Virginia have spent an additional **$3 billion** on gas since the beginning of the war. That has cost the average family in Virginia an additional **$935** in gas costs.
- Families in Virginia **spent an additional $170 on electricity** in 2025 under President Trump than they did in 2024. And, in just the first seven months of 2026, they spent an additional **$220** on electricity than they did in the first seven months of 2024.

Health Care Costs

- Because of Trump and Republicans' refusal to extend the Affordable Care Act (ACA) tax cuts that help people afford their health insurance, monthly premiums for ACA plans **rose over 50 percent on average** in 2026 compared to last year. Meanwhile deductibles surged to record highs, increasing by more than $1,000 on average.
