

Economic Overview And Outlook: North Carolina

JOBS

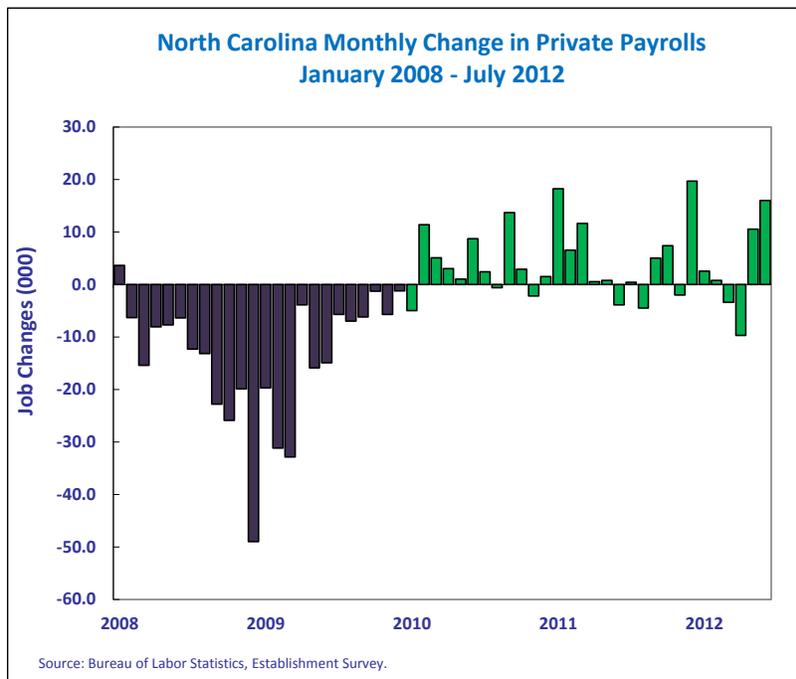

- Including July, the private sector has gained jobs nationwide for 29 consecutive months.
- In North Carolina, private sector employment fell by 9.6 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.9 percent.
- In North Carolina, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in North Carolina have experienced the greatest employment increases: professional and business services; leisure and hospitality; and trade, transportation and utilities.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in North Carolina was 9.6 percent in July 2012, up 4.6 percentage points from December 2007, but down from its most recent peak of 11.4 percent in February 2010.
- 445,000 residents were counted among the unemployed in North Carolina during July 2012.
- In North Carolina, initial claims for unemployment insurance benefits totaled 61,544 during July, up 8.7 percent from the previous month. Since peaking at 135,178 in March 2009, initial claims for unemployment insurance benefits have declined by 54.5 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 1st quarter of 2012, total personal income is 0.7 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in North Carolina was \$31,579.10 in the 1st quarter of 2012, up from \$31,332.10 in the 1st quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 16.8 percent over 17 quarters. Between the second quarter of 2011 and the first quarter of 2012, the most recent quarter, national home prices rose by 0.2 percent.
- In North Carolina, home prices have fallen by 10.6 percent over 12 quarters from their peak in the first quarter of 2009.
- As of the 2nd quarter of 2012, 3.0 percent of all mortgages, including 9.5 percent of subprime mortgages, were in foreclosure in North Carolina.
- Housing starts in North Carolina totaled 39,800 units (seasonally adjusted annual rate) in June 2012, a decrease of 21.2 percent from May.
- Within the South census region, which includes North Carolina, sales of new single-family homes totaled 181,000 units in June 2012, a decrease of 8.6 percent from May. Sales of existing single-family homes decreased 4.4 percent to 1,520,000 units (at seasonally adjusted annual rates) from May to June 2012.

How Does North Carolina Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare North Carolina to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within North Carolina since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in North Carolina.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		North Carolina	United States
Unemployment Rates	July 2009	10.7%	9.5%
	July 2010	10.8%	9.5%
	July 2011	10.7%	9.1%
	July 2012	9.6%	8.3%
