

Economic Overview And Outlook: Wyoming

JOBS

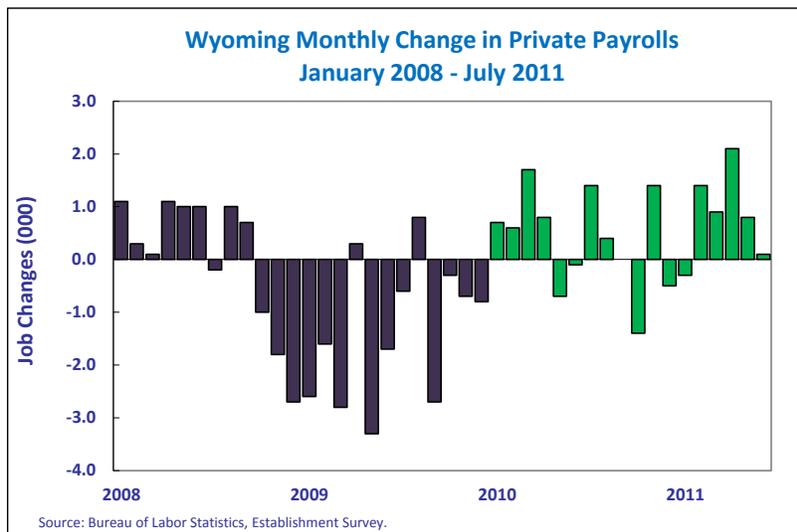

- Including July, the private sector has gained jobs nationwide for 17 consecutive months.
- In Wyoming, private sector employment fell by 8.3 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.7 percent.
- In Wyoming, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Wyoming have experienced the greatest employment increases: mining; professional and business services; and leisure and hospitality.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

EMPLOYMENT

- The unemployment rate in Wyoming was 5.8 percent in July 2011, up 3.2 percentage points from December 2007, but down from its most recent peak of 7.7 percent in December 2009.
- 17,000 Wyoming residents were counted among the unemployed in Wyoming during July 2011.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 2.2 percent. Most recently, in the 1st quarter of 2011, total personal income is 1.1 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Wyoming was \$43,855.90 in the 1st quarter of 2011, down from \$44,587.90 in the 1st quarter of 2009.

HOUSING

- National home prices, including distressed sales, saw a decrease of 6.8 percent in June 2011 from June 2010 compared to a 6.7 percent decrease in May. In Wyoming, home prices saw a decrease of 2.5 percent in June 2011 from June 2010 following May's year over year decrease of 3.0 percent.
- The median price of single-family homes in Wyoming was \$183,202 in the second quarter of 2010, compared to \$180,176 nationwide.
- As of the 1st quarter of 2011, 1.3 percent of all mortgages, including 7.6 percent of subprime mortgages, were in foreclosure in Wyoming.
- Housing starts in Wyoming totaled 2,720 units (seasonally adjusted annual rate) in June 2011, an increase of 80.1 percent from May.
- Within the West census region, which includes Wyoming, sales of new single-family homes totaled 69,000 units in June 2011, a decrease of 12.7 percent from May. Sales of existing single-family homes decreased 12.8 percent to 950,000 units (at seasonally adjusted annual rates) from June to July 2011.

How Does Wyoming Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Wyoming to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Wyoming since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Wyoming.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Wyoming	United States
Unemployment Rates	July 2008	3.2%	5.8%
	July 2009	7.0%	9.5%
	July 2010	6.9%	9.5%
	July 2011	5.8%	9.1%
