

Economic Overview And Outlook: Georgia

JOBS

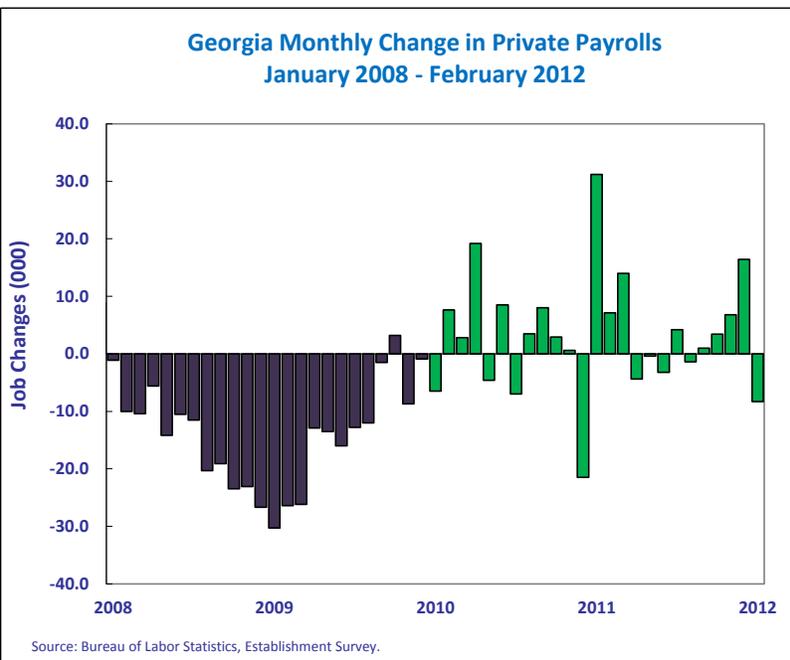

- Including February, the private sector has gained jobs nationwide for 24 consecutive months.
- In Georgia, private sector employment fell by 9.6 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.2 percent.
- In Georgia, employees in the construction, manufacturing, and professional and business services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Georgia have experienced the greatest employment increases: professional and business services; education and health services; and trade, transportation and utilities.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Georgia was 9.1 percent in February 2012, up 4.0 percentage points from December 2007, but down from its most recent peak of 10.5 percent in January 2010.
- 433,000 Georgia residents were counted among the unemployed in Georgia during February 2012.
- In Georgia, initial claims for unemployment insurance benefits totaled 48,869 during February, down 8.2 percent from the previous month. Since peaking at 103,264 in March 2009, initial claims for unemployment insurance benefits in Georgia have declined by 52.7 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 4th quarter of 2011, total personal income is 0.9 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Georgia was \$31,742.50 in the 4th quarter of 2011, up from \$30,699.80 in the 4th quarter of 2009.

HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 16.6 percent over 17 quarters. Between the second quarter of 2011 and the fourth quarter of 2011, the most recent quarter, national home prices rose by 1.4 percent.
- In Georgia, home prices fell by 19.3 percent over 13 quarters from their peak in the first quarter of 2008. Since the second quarter of 2011, home prices in Georgia have risen by 0.5 percent.
- As of the 4th quarter of 2011, 3.1 percent of all mortgages, including 8.3 percent of subprime mortgages, were in foreclosure in Georgia.
- Housing starts in Georgia totaled 32,860 units (seasonally adjusted annual rate) in February 2012, an increase of 39.8 percent from January.
- Within the South census region, which includes Georgia, sales of new single-family homes totaled 168,000 units in February 2012, a decrease of 7.2 percent from January. Sales of existing single-family homes remained steady at 1,540,000 units (at seasonally adjusted annual rates) from January to February 2012.

How Does Georgia Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Georgia to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Georgia since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Georgia.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Georgia	United States
Unemployment Rates	February 2009	8.9%	8.3%
	February 2010	10.4%	9.8%
	February 2011	9.9%	9.0%
	February 2012	9.1%	8.3%
Percent of Population Who Are Veterans	2011	10.1%	9.4%
All Veterans' Unemployment Rate	2011	9.0%	8.3%
Post-9/11 Veterans' Unemployment Rate	2011	14.2%	12.1%
