

Economic Overview And Outlook: Connecticut

JOBS

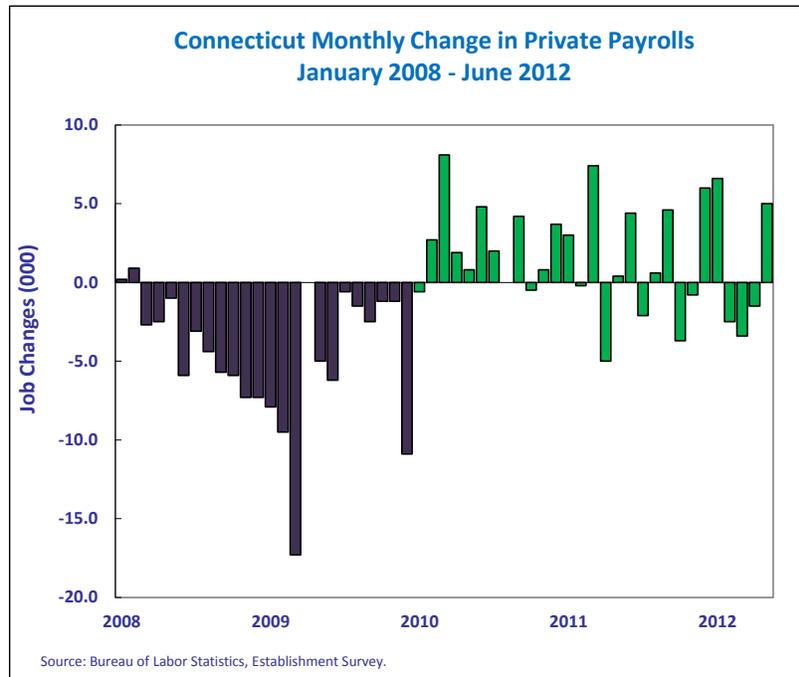

- Including June, the private sector has gained jobs nationwide for 28 consecutive months.
- In Connecticut, private sector employment fell by 7.5 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.5 percent.
- In Connecticut, employees in the construction, professional and business services, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Connecticut have experienced the greatest employment increases: education and health services; leisure and hospitality; and professional and business services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Connecticut was 8.1 percent in June 2012, up 3.2 percentage points from December 2007, but down from its most recent peak of 9.4 percent in December 2010.
- 155,000 residents were counted among the unemployed in Connecticut during June 2012.
- In Connecticut, initial claims for unemployment insurance benefits totaled 23,715 during June, up 11.6 percent from the previous month. Since peaking at 38,259 in November 2011, initial claims for unemployment insurance benefits in Connecticut have declined by 38.0 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 1st quarter of 2012, total personal income is 0.7 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in Connecticut was \$49,615.40 in the 1st quarter of 2012, up from \$48,034.20 in the 1st quarter of 2010.

HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 16.8 percent over 17 quarters. Between the second quarter of 2011 and the first quarter of 2012, the most recent quarter, national home prices rose by 0.2 percent.
- In Connecticut, home prices have fallen by 16.1 percent over 20 quarters from their peak in the first quarter of 2007.
- As of the 1st quarter of 2012, 5.4 percent of all mortgages, including 19.2 percent of subprime mortgages, were in foreclosure in Connecticut.
- Housing starts in Connecticut totaled 3,100 units (seasonally adjusted annual rate) in May 2012, an increase of 20.6 percent from April.
- Within the Northeast census region, which includes Connecticut, sales of new single-family homes totaled 41,000 units in May 2012, an increase of 36.7 percent from April. Sales of existing single-family homes decreased 11.8 percent to 450,000 units (at seasonally adjusted annual rates) from May to June 2012.

How Does Connecticut Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Connecticut to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Connecticut since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Connecticut.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.

STATE QUICK FACTS

		Connecticut	United States
Unemployment Rates	June 2009	8.3%	9.5%
	June 2010	9.3%	9.4%
	June 2011	8.9%	9.1%
	June 2012	8.1%	8.2%
