

Economic Overview And Outlook: Massachusetts

JOBS

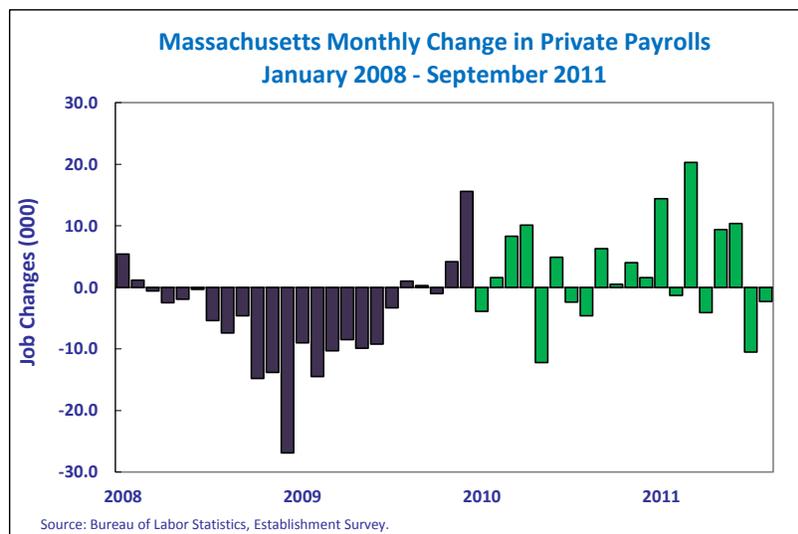

- Including September, the private sector has gained jobs nationwide for 19 consecutive months.
- In Massachusetts, private sector employment fell by 4.3 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 2.2 percent.
- In Massachusetts, employees in the construction, mining, and manufacturing sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Massachusetts have experienced the greatest employment increases: professional and business services; information services; and leisure and hospitality.*
- As the economy recovers from the Great Recession, service-providing industries are projected to add the most jobs between 2008 and 2018, with the largest gains in professional and business services, education, health care and social assistance, and State and local government. Within the goods-producing sector of the economy, only the construction industry is projected to add jobs above its 2008 level.

How Does Massachusetts Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Massachusetts to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Massachusetts since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Massachusetts.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.
