

Economic Overview And Outlook: New Mexico

JOBS

- Including June, the private sector has gained jobs nationwide for 40 consecutive months.
- In New Mexico, private sector employment fell by 7.2 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 3.0 percent.
- In New Mexico, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in New Mexico have experienced the greatest employment increases: mining; leisure and hospitality; and financial activities.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in New Mexico was 6.8 percent in June 2013, up 3.2 percentage points from December 2007, but down from its most recent peak of 8.0 percent in September 2010.
- 64,000 residents were counted among the unemployed in New Mexico during June 2013.
- In New Mexico, initial claims for unemployment insurance benefits totaled 5,875 during June, down 13.6 percent from the previous month. Since peaking at 10,946 in February 2009, initial claims for unemployment insurance benefits have declined by 46.3 percent.

EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 1st quarter of 2013, total personal income is 2.5 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2005 \$) in New Mexico was \$30,134.20 in the 1st quarter of 2013, down from \$30,149.50 in the 1st quarter of 2011.

HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 17.8 percent over 17 quarters. Between the second quarter of 2011 and the first quarter of 2013, the most recent quarter, national home prices rose by 2.4 percent.
- In New Mexico, home prices fell by 15.4 percent over 17 quarters from their peak in the first quarter of 2008. Since the second quarter of 2012, home prices in New Mexico have risen by 1.3 percent.
- As of the 1st quarter of 2013, 3.7 percent of all mortgages, including 11.3 percent of subprime mortgages, were in foreclosure in New Mexico.
- Housing starts in New Mexico totaled 3,810 units (seasonally adjusted annual rate) in May 2013, an increase of 6.1 percent from April.
- Within the West census region, which includes New Mexico, sales of new single-family homes totaled 115,000 units in May 2013, an increase of 3.6 percent from April. Sales of existing single-family homes increased 2.8 percent to 1,090,000 units (at seasonally adjusted annual rates) from April to May 2013.

How Does New Mexico Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare New Mexico to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Mexico since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in New Mexico.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

STATE QUICK FACTS

		New Mexico	United States
Unemployment Rates	June 2010	7.9%	9.4%
	June 2011	7.6%	9.1%
	June 2012	7.0%	8.2%
