LETTERS OF TRANSMITTAL

AUGUST 2, 1973.

To the members of the Joint Economic Committee:

Transmitted herewith is a volume entitled "Additional Material for Paper No. 6: How Public Welfare Benefits are Distributed in Low-Income Areas." It was prepared by the Subcommittee on Fiscal Policy in conjunction with its review of the Nation's public welfare programs. This supplement to Paper No. 6 provides more detailed information regarding the distribution of public welfare benefits.

WRIGHT PATMAN,
Chairman, Joint Economic Committee.

JULY 31, 1973.

HON. WRIGHT PATMAN,
*Chairman, Joint Economic Committee,
U.S. Congress, Washington, D.C.*

DEAR MR. CHAIRMAN: Transmitted herewith is a volume entitled "Additional Material for Paper No. 6: How Public Welfare Benefits are Distributed in Low-Income Areas."

Considerable public interest was aroused by Paper No. 6. The subcommittee is providing more detailed statistical data on which that study was based and graphic material for use by interested persons. The accompanying material describing the methodology and the data limitations should be read carefully, however, by anyone undertaking analysis of the data.

The data were collected at the subcommittee's request by the General Accounting Office. We are grateful to Congressman Wayne L. Hays, chairman of the House Administration Committee, for his cooperation in facilitating processing of the data by the House Information Systems Computer Center, which is under that committee's jurisdiction. Frank B. Ryan, director of House Information Systems, and Charles N. Arrowsmith, formerly of the House Information Systems staff, assisted with the tabulations of this supplement.

This volume was compiled by Alair A. Townsend of the subcommittee staff. Staff member James R. Storey developed the tabulation specifications, and Caterina C. Sparacino provided research assistance.

MARTHA W. GRIFFITHS,
Chairman, Subcommittee on Fiscal Policy.

DESCRIPTION OF THE METHODOLOGY

This supplement was designed to be used in conjunction with Paper No. 6. Since that study contains a detailed description of the methodology employed, only a summary is provided here.

- In conjunction with the General Accounting Office (GAO), the Subcommittee on Fiscal Policy chose as study sites 6 areas of the Nation from among the 59 areas which have been designated by the Census Bureau as low-income areas.
- Random samples of up to 350 households in each of the 6 areas were drawn by the GAO.
- Members of the sample households were identified using locally available resources.
- The records of 100 Federal, State, and local programs were examined to determine whether any members of the households participated in them, the amount and nature of the benefits, and other social and economic characteristics of the households. This information was assembled and analyzed in the aggregate. The 100 programs searched include all cash benefit programs under Federal, State, or local sponsorship, such as public assistance, veterans' pensions and compensation, Government employee retirement and disability plans, workmen's compensation, unemployment insurance, and social security. Also examined were all programs offering subsidies in the form of food, medical, or housing benefits. Finally, service programs such as legal aid, child care, manpower training, and education assistance were included. A complete list of programs examined at each site may be found in supplement A (table 1) of Paper No. 6. The specifications of how dollar values were assigned to the various benefits are contained in supplement B (table 2) of Paper No. 6.

Special Considerations Relating to the Data

In order to assure confidentiality, the six sites have been given fictitious names which reveal only their general location and whether they are rural or urban areas. The sites are referred to in the following way:

| | |
|---------------------|-----------------|
| Eastern City | Midwestern City |
| South Atlantic City | Western City |
| Southern City | Rural Counties |

The data in this study are based on the benefits available to the total household rather than to selected subgroups of the household. The study methodology did not permit analysis of separate families within households. Thus, if an aid to families with dependent children (AFDC) mother and her child live with the mother's parents, all benefits flowing into that household were included. The grandparents and the mother and child were not treated as two separate family units. Apart from data collection expedience, the assumption is that the focus on households more truly reflects economic units and shared resources.

The time period examined by the study is also important in determining adequacy of income and benefits. Because some programs (for example, school feeding programs, training programs, unemployment insurance) provide benefits only for part of a year, and because the circumstances of low-income families tend to fluctuate, it was decided to collect benefit information from these programs for a 12-month period, and to compute an average monthly benefit

amount. However, a common 12-month period could not always be applied, since the currency and structure of agency records vary across programs.

Further, for some programs the accumulation of a 12-month record of benefits would have involved a detailed record search which was impossible, given the staff resources and the time frame for the study. For example, AFDC benefits often change from month to month as family income changes. But such changes will usually not be systematically summarized in the family's case file. Thus, to record AFDC benefit amounts month by month for a year would require a thorough search of the family's casework file, which is often a voluminous and poorly organized pile of paper if the family has spent more than a few months on welfare. And changes other than income must be watched for as well. Family composition often will change, which may alter the family's eligibility status or convert one AFDC case into two cases (as when a teenage daughter bears a child of her own).

For all these reasons, the GAO decided to accumulate information on public assistance, food stamps, and other programs that provide continuing assistance on a current-month basis. This method results in an underestimate of the number of households actually receiving these benefits over a 12-month period. This procedure also has implications for the measurement of a given household's income, but in the aggregate a monthly sampling of AFDC benefits should adequately reflect statistically all AFDC benefits paid out over the 12 months circumscribing the survey month.

Thus, for some income sources and programs, current monthly income and benefits were recorded. For other programs dispensing benefits part year (e.g., unemployment insurance) or as needed (e.g., medicare), records were searched to discover whether any benefits had been received in the preceding year, and an average monthly benefit was computed from the annual figure. This procedure gives a more accurate picture of a household's economic circumstances than looking only at 1 month. At one point in time a household may have no earned income and may participate in only three programs. Over the course of a year, however, its members may earn \$3,000 and benefit from six programs. Indeed, the data collected by the GAO indicate, for example, that at least 47 percent of the households currently receiving AFDC also received earnings from adult members some time in the preceding year.

Every person living in the sample households could not be identified. To the extent that some persons were not identified, it is likely that the income and benefits they received were not recorded. Therefore, the tabulations of benefits received by households should be treated as conservative figures.

Private sources of income have not been identified fully, especially where no household members were found in agency records. The lack of such information, particularly on earnings, makes it impossible to make general comparisons between recipients and nonrecipients, or even among the recipients as a group. Census Bureau data on these six areas suggest, however, that households for which no private income or benefits were found were largely nonpoor.

Noncash benefits are difficult to value in terms of household income. Determining how to value a program's benefit is relatively easy for cash and for most food assistance programs. But such valuation gets progressively more difficult as one moves into other categories of noncash aid. For programs such as manpower training, child care, and legal aid programs, benefits had to be valued in terms of unit cost and, in some cases, program accounting data would not even permit the derivation of a unit cost figure. Thus, in a few instances, benefits were recorded and identified to households, but no dollar values could be assigned to them. The reader must consider carefully the income significance of all noncash aid.

Another problem inherent in the survey approach taken by the GAO is that its accuracy is greatly dependent on the validity of agency records. For example, there is evidence that many incorrect payments are made to welfare families, in part because of errors and gaps in the data upon which payment calculations were based. In many cases the GAO undoubtedly drew upon this inaccurate supporting data on income and family composition.

Finally, the data here cannot be generalized to represent the distribution of benefits and services for the total U.S. population. However, the findings are suggestive and informative for the six poverty areas and are relevant to all such areas. The combined impact of public programs on poverty areas is important in and of itself, since these areas have a large share of the Nation's low-income population and constitute portions of States or cities over which public programs may have a dominant influence economically and socially.

EXPLANATION OF TABLES 1 THROUGH 6

Tables 1 through 6 contain a listing of each unique combination of private income and public benefit sources received by at least one household in each particular site. These income and benefit sources are shown in numeric code form for easy reference. The codes are listed below.

Looking at table 1, one learns that code 01 (adult earnings) was the only income or benefit source located for 16 households containing 47 people. These households received a known total of \$8,657 in monthly earnings averaged over the year.

Over the course of 1 year, one household in Eastern City received the unique combination of codes 01, 03, 10, 42, 63, and 89. As shown in the code list below, this combination includes adult earnings, unearned income from private sources, aid to families with dependent children, workmen's compensation, public health services, and "other" education and manpower benefits. These sources totaled \$436 in average monthly income and benefits, of which \$162 was from private sources (codes 01 and 03), and \$274 was from public sources (codes 10, 42, 63, and 89).

The codes are arrayed in ascending numerical order, both within a given combination and down the table.

Codes for Private Income and Public Benefit Sources

| <i>Code</i> | <i>Sources</i> | <i>Code</i> | <i>Sources</i> |
|-------------|--|-------------|--|
| | <i>Private income</i> | | <i>Health benefits</i> |
| 01 | Earnings of adults. | 60 | Medicare (health insurance and supplementary medical insurance). |
| 02 | Earnings of children. | 61 | Medicaid (title XIX). ¹ |
| 03 | Unearned income from private sources (private pensions; alimony and child support; investment income; etc.). | 62 | Medical assistance under general assistance program. ¹ |
| | <i>Public cash income and other benefits—Cash welfare benefits</i> | 63 | Public health services. ¹ |
| 10 | Aid to families with dependent children. ¹ | 64 | VA medical care (including all health care funded by Veterans' Administration). |
| 11 | Old age assistance. ¹ | 65 | OEO emergency health services. ¹ |
| 12 | Aid to the permanently and totally disabled. ¹ | 69 | All other. ¹ |
| 13 | Aid to the blind. ¹ | | <i>Housing benefits</i> |
| 14 | General assistance. ¹ | 70 | Public housing rental units. ¹ |
| 15 | Foster care. ¹ | 71 | Rent supplement units. ¹ |
| 16 | Assistance to Cuban refugees. ¹ | 72 | Section 235 (interest subsidy). ¹ |
| 17 | Welfare—special needs. ¹ | 73 | Section 236 (interest reduction payments—rental and cooperative housing for lower income families). ¹ |
| | <i>Cash social security benefits</i> | 74 | Relocation programs. ¹ |
| 20 | Old age insurance. | 75 | Rehabilitation programs. ¹ |
| 21 | Survivors insurance. | 76 | Agricultural housing programs. ¹ |
| 22 | Disability insurance. | 79 | All other. ¹ |
| 23 | Special age 72 benefits. | | <i>Education and manpower benefits</i> |
| 24 | Special coal miners benefits. | 80 | WIN (work incentive program). ¹ |
| | <i>Veterans cash benefits</i> | 81 | MDTA (Manpower Development and Training). ¹ |
| 30 | Compensation—veterans. | 82 | CEP (including operation mainstream—concentrated employment program). ¹ |
| 31 | Compensation—survivors. | 83 | NYC (Neighborhood Youth Corps). ¹ |
| 32 | Pension—veterans. ¹ | 84 | EEA (Emergency Employment Act). ¹ |
| 33 | Pension—survivors. ¹ | 85 | JOBS (Job Opportunities in the Business Sector). ¹ |
| | <i>Other cash benefits</i> | 86 | GI bill (Veterans Educational Assistance). |
| 40 | Retirement (railroad retirement; military retirement; other Federal, State, and local employee retirement). | 87 | OE grants and loans (Office of Education). ¹ |
| 41 | Unemployment insurance (State program, railroad program). | 88 | Vocational rehabilitation. ¹ |
| 42 | Workmen's compensation (Federal and State programs). | 89 | All other. ¹ |
| 49 | All other. | | <i>Other benefits</i> |
| | <i>Food benefits</i> | 90 | WIN day care (work incentive program). ¹ |
| 50 | Food stamps (amount of bonus). ¹ | 91 | Head Start. ¹ |
| 51 | Food distribution (surplus commodities). ¹ | 92 | Other day care. ¹ |
| 52 | School breakfast. ¹ | 93 | Legal aid. ¹ |
| 53 | School lunch. ¹ | 94 | Agricultural subsidy payments. |
| 54 | OEO emergency food assistance. ¹ | 99 | All others. ¹ |
| 59 | All others. ¹ | | |

¹ Eligibility and/or benefits under this program are based primarily on the current need of the recipients.

TABLE 1.—Total number of households and people receiving unique income and benefit combinations, and total monthly amounts received: Eastern City

[Code numbers in bold, see p. 5]

| Income and program combinations | | | | | | | | | | Total monthly income from | | Total number receiving combinations | |
|---------------------------------|----|----|----|----|----|----|----|----|--|---------------------------|----------------|-------------------------------------|----------------------|

NOTE.—Households with no income or benefits located=114.

EXPLANATION OF TABLES 7 THROUGH 12

Tables 7 through 12 list every income and benefit source and, for households receiving each source, give a distribution of the total number of public benefits received. Thus, in table 7, it can be seen that a total of 69 of the sampled households in Eastern City were known to have had adult earnings (code 01) for some portion of the year. Sixteen of these households received no public benefits, while 14 participated in one public welfare program and one household received benefits from 7 programs over the course of a year. The one household participating in 7 programs and having adult earnings received an average monthly total of \$441 from the 7 programs. With earnings, their average monthly income totaled \$851.

A total of 65 households received benefits from AFDC (code 10). Of these, 3 households received AFDC only, while 11 received one additional program (2 programs in total), and 8 households received 5 other benefits (6 benefits in all). These 8 households received a monthly total of \$4,559 in benefits and \$5,779 in total income.

Income and benefit sources not received by any households in a particular site are not listed. Since none of the sampled households in Eastern City received code 13 (aid to the blind), this code is not listed in table 7. If a household has more than one income and benefit source, the household will be included under each source from which it derives income or benefits.

TABLE 7.—*Income and benefit sources by number of public benefit programs received, number of households receiving, and monthly income from public sources and from all sources: Eastern City*

¹ Since households may have more than 1 of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 11 households are

listed for code 20) means that these households received that one program only.

³ Monthly benefits refers to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

¹ Since households may have more than one of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 18 households are listed

for code 20) means that these households received that one program only.

³ Monthly benefits refers to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

¹ Since households may have more than one of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 7 households

are listed for code 20) means that these households received that 1 program only.

³ Monthly benefits refers to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

TABLE 10.—*Income and benefit sources by number of public benefit programs received, number of households receiving, and monthly income from public sources and from all sources: Midwestern City*

¹ Since households may have more than one of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 16 households

are listed for code 20) means that these households received that one program only.

³ Monthly benefits refers to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

TABLE 11.—*Income and benefit sources by number of public benefit programs received, number of households receiving, and monthly income from public sources and from all sources: Western City*

¹ Since households may have more than one of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 11 households are

listed for code 20) means that these households received that one program only.

³ Monthly benefits refers to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

¹ Since households may have more than one of these private income and public benefit sources, specific households will be included under each source from which they derive income or benefits.

² Only separate public programs are counted here; private earnings and other income were not included in summing the number of public benefits received. For households receiving a public benefit (code 20, for example), the listing of households under 1 (as 32 households are

listed for code 20) means that these households received that one program only.

³ Monthly benefits refer to the value or cost of all public benefits, whether in the form of cash, goods, or services, which all households in that cell received.

⁴ Total monthly income includes all public benefits and private income which all households in that cell received.

⁵ If no households in this location participated in a program, that program is not listed.

EXPLANATION OF TABLES 13 THROUGH 18

Tables 13 through 18 show the number of households receiving benefits from combinations of any two sources of income and benefits, and the total monthly amounts received from these combinations.

In table 13, 113 households are listed as having no income or benefits located for them. By looking at code 01 (adult earnings) on the left hand side and following across the table, one can determine the number of households receiving adult earnings and other specific programs. For example, 18 households received AFDC and had adult earnings for some portion of the year. These 18 households received a total of \$8,975 in adult earnings and AFDC in an average month. The intersection in the table of two identical codes (say, code 10) provides a count of the total number of sampled households in that site having that income or benefit source. In the case of code 10, AFDC, the total number of households is 65 and the total monthly AFDC benefits these households received is \$17,784.

If a household derives income and benefits from more than one source, this household will appear under several combinations. For example, if a household has codes 10, 50, and 61, entries will be found under each of these codes.

¹ If a household derives income and benefits from more than one source, this household will appear under several combinations.

² "None" refers to the households for which no private income or public benefit was located.

³ If no households in this location derived income from a particular program or private source, that source is not listed.

4 "Monthly income from both" refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

public benefit sources, and total monthly amount received from the combinations: South Atlantic City
bold, see p. 5]

¹ If a household derives income and benefits from more than one source, this household will appear under several combinations.

² "None" refers to the households for which no private income or public benefit was located.

³ If no households in this location derived income from a particular program or private source, that source is not listed.

⁴ "Monthly income from both" refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

TABLE 15.—Number of households receiving benefits from combinations of 2 private income

¹ If a household derives income and benefits from more than 1 source, this household will appear under several combinations.

² "None" refers to the households for which no private income or public benefit was located.

benefit sources, and total monthly amount received from the combinations: Southern City—Continued

³ If no households in this location derived income from a particular program or private source, that source is not listed.

⁴ "Monthly income from both" refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

TABLE 16.—*Number of households receiving benefits from combinations of 2 private income*

¹ If a household derives income and benefits from more than one source, this household will appear under several combinations.

² "None" refers to the households for which no private income or public benefit was located.

TABLE 17.—*Number of households receiving benefits from combinations of 2 private income*

* If no households in this location derived income from a particular program or private source, that source is not listed.

“Monthly income from both” refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

³ If no households in this location derived income from a particular program or private source, that source is not listed.

⁴ "Monthly income from both" refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

TABLE 18.—*Number of households receiving benefits from combinations of 2 private income*

¹ If a household derives income and benefits from more than one source, this household will appear under several combinations.

² "None" refers to the households for which no private income or public benefits was located.

³ If no households in this location derived income from a particular program or private source, that source is not listed.

⁴ "Monthly income from both" refers to the value or cost of the specific combinations of public benefits or other private income noted. It does not include income from public programs or private sources not included in the combinations noted.

EXPLANATION OF TABLES 19 THROUGH 36

Tables 19 through 36 present income and benefit information on households receiving benefits from at least one need-based program such as aid to families with dependent children, food stamps, medicaid, or public housing.¹ The data are presented by family size and by income intervals, so that the economic circumstances of households participating in need-based programs can be fixed more precisely. Three tables are presented for each site, with each successive table per site folding in more of the households' total income and benefits.

The first table in each site counts only cash income, whether in the form of earnings, dividends, need-based cash payments, or social insurance benefits. The households are distributed by size (left hand columns) and by cash income intervals (across the top.) It can be seen from table 19 that there are 28 one-person households receiving need-based benefits in Eastern City. Of these, slightly less than half (13) remain below the poverty line if only their cash income is counted. One household, falling into the \$51-\$100 interval, had only \$63 in average monthly cash income and benefits, while another household fell into the \$301-\$350 interval, having \$322 in average monthly cash income.

The second table for each site shows the impact of including the value of food and housing benefits in evaluating households' economic circumstances and in calculating the impact of these benefits in reducing poverty. These in-kind benefits are valued at their market value (as in the case of the food stamp bonus or the public housing unit) or at their cost to the Government (as in the case of free school lunches). *Of course, the value of these benefits to recipients may not be as high as their market value or their cost to the Government.*

Table 20 shows that in Eastern City, adding food and housing benefits in with cash income reduces the number of one-person households in poverty to eight. Seven households fell in the \$151-\$200 income and benefit interval, having total monthly income and benefits of \$1,214—an average of \$173.

The last table in each site shows the total value or cost of all income and benefits received by households participating in one or more need-based programs. These benefits include subsidized medical care, legal services, day care, training, and a variety of other goods and services. *It is explicitly recognized that most of these additional goods and services do not have the same value to recipients as cash, food, or housing in terms of supplementing current personal consumption and providing for daily living needs. But their cost or value is included here to provide an indication of the total value or cost of publicly and privately provided cash, goods, and services. Thus, the figure on the number remaining below the poverty level should be interpreted with caution.*

Some households are shown as having no income or benefits. These households are likely to have private income which did not turn up in program record checks. Comparison of sample households with census data for these six sites suggests that most households with no income or benefits reported are nonpoor.

Table 21 indicates that when all income and benefits are included, seven one-person households in Eastern City still remain poor. One one-person household stills falls in the \$51-\$100 interval, while another has income and benefits in the \$601-\$700 range.

The poverty levels used are listed below.

¹ For a complete list of need-based programs, see p. 5.

¹ Total income and benefits include all private income and all public benefits, whether or not based on need.

² Need-based programs are those which base benefits on recipients' income needs. Examples of such programs are aid to families with dependent children (AFDC), food stamps, medicaid, and public housing.

GRAPHIC MATERIAL FOR PAPER NO. 6

(The following graphic material was prepared for use with Paper No. 6)

WHY THIS STUDY WAS DONE

- Many programs exist which distribute cash, food, housing, medical care, and other valuable goods and services. These programs generally have been enacted and are administered separately, despite the fact that many people benefit from more than one program.

- Official surveys (such as the Census) and program statistics do not contain information on the full range of these programs. This study was designed to obtain a picture of who receives benefits from what programs and in what amounts.

- The findings have relevance to policy questions such as:

- The adequacy of combined benefits;
- How equitably benefits are distributed;
- The work incentive aspects of combined benefits; and
- The administrative problems created by the operation of 100 programs.

- Programs covered include:

- Social Insurance (Social Security, Unemployment Insurance, Workmen's Compensation, Veterans' Compensation);
- Need-based cash (Public Assistance, Veterans' Pensions, General Assistance);
- Food, health, and housing programs;
- Training, scholarships, public employment, and Day Care; and
- Other service programs.

THE AREAS SAMPLED, AND THE CONDUCT OF THE STUDY

- The study is not based on a nationally representative sample. The costs prohibited this. Therefore, the findings cannot be generalized rigorously to the entire country, or to all the poor. The findings are statistically valid only for the six low-income areas in which the study was conducted.

- The study is based on a random sample of 1,758 households drawn from six sites. These are six of the 59 sites which the Census Bureau has designated as 'Low Income' areas. Four sites are sections of large cities, one includes parts of a medium-sized city, and one consists of several rural counties. Sites are identified with descriptive rather than actual names to retain maximum confidentiality.

- Since the study sites are low-income areas, it should be expected that the households sampled will participate more heavily in welfare programs than the general population. About one in four of all families in these areas are poor.

- Information was collected from program records, not from interviews. Records of most programs were checked to see if benefits had been received by any household members anytime during the year. If they had been received, average monthly amounts were calculated. Thus, benefits were not necessarily received all at once.

- The information was collected and is presented on a household rather than a family basis. Some households contain several families or more than a simple family. For example, a young couple with children may have their elderly parents living with them.

HOW MANY HOUSEHOLDS RECEIVE BENEFITS?

The number of households which have contact with the public welfare bureaucracy is far greater than the number receiving cash welfare benefits such as Aid to Families with Dependent Children (AFDC).

(*) Sixty percent of the sample households received at least one benefit. Forty percent received benefits from 2 or more programs, 11 percent participated in 5 or more programs, on down to almost 1 percent involved in 9 to 11 programs. One household received benefits from 11 different programs.

The typical beneficiary does not participate in one and only one program.

Chart 1. **SAMPLE HOUSEHOLDS BY NUMBER OF BENEFITS RECEIVED**

THERE ARE VARIATIONS FROM SITE TO SITE IN HOUSEHOLD PARTICIPATION IN PROGRAMS

The proportion of households receiving benefits varies widely among the six sites.

(98) Relatively more households received benefits in the two southern cities than in any of the other sites. This reflects several factors. First, wages are low in these areas, so that working people can qualify for benefits such as food stamps or commodities. Second, these cities contain many female-headed families which are eligible for aid to families with dependent children. Finally, many households contain more than one family—such as elderly parents living with grown children. “Doubling up” increases the likelihood that households will receive benefits.

Chart 2. OVER HALF THE SAMPLE HOUSEHOLDS RECEIVE A BENEFIT; RECIPIENT HOUSEHOLDS OFTEN RECEIVE SEVERAL BENEFITS

**SOME HOUSEHOLD TYPES ARE MORE LIKELY TO RECEIVE
BENEFITS THAN OTHERS**

(86) Certain types of households are more likely to receive benefits than others. These include large households, those with children, and those with household heads aged 65 or over. Male-headed households tend to be less likely to receive benefits. These findings are consistent with program eligibility rules and with the earning levels of the various household types.

Chart 3. THE HIGHEST BENEFIT SHARES GO TO HOUSEHOLDS WITH AGED HEADS, LARGE HOUSEHOLDS, AND HOUSEHOLDS WITH CHILDREN

Characteristics of sample households in urban sites as

WHO RECEIVES LARGE NUMBERS OF BENEFITS?

Without violating law, households can receive benefits under five or more programs. As in shown in chart 3, certain types of households are more likely to be multibeneficiaries than others. But there is no general rule. There is great diversity in the situations of both those households which receive many benefits and those which receive very few or no benefits.

(100) Chart 4 examines some actual cases to illustrate the diversity among households which benefit from many programs.

Dollar values have been assigned to noncash benefits such as food, health care, and housing based on their cost to the Government (as in the case of health care) or their net retail value (as in the case of food stamps). It is doubtless true that such goods and services are not so valuable to recipients as cash. But to ignore their value is to assume that these noncash benefits are worthless. This is clearly not true.

Chart 4. EXAMPLES OF HOUSEHOLDS RECEIVING LARGE NUMBERS OF BENEFITS

A. A couple in Eastern City supporting a young child and the wife's teen-aged brother with 5 benefits:

| PROGRAM | AMOUNT PER MONTH |
|--------------------------|---------------------|
| AFDC | \$ 21 |
| General assistance | 83 |
| Food stamps | 34 |
| Medicaid | 123 |
| Public housing | 106 |
| Neighborhood youth corps | 18 |
| Benefits, total | <u>\$385</u> |
| Earnings | <u>429</u> |
| Total income | <u>\$814</u> |

B. 17-year old mother of 2 children in South Atlantic City with 8 benefits:

| PROGRAM | AMOUNT PER MONTH |
|---------------------------------|---------------------|
| AFDC | \$176 |
| Welfare grant for special needs | 50 |
| Food stamps | 20 |
| Medicaid | 33 |
| Public health services | 21 |
| Public housing | 56 |
| Housing relocation grant | 2 |
| Concentrated employment (CEP) | 6 |
| Neighborhood youth corps | <u>178</u> |
| Benefits, total | <u>\$542</u> |
| Earnings | <u>56</u> |
| Total income | <u>\$598</u> |

C. A 3-generation family of 5 in Southern City with 11 benefits:

| PROGRAM | AMOUNT PER MONTH |
|---------------------------------------|---------------------|
| AFDC | \$ 79 |
| Old age assistance | 91 |
| Social security (old age benefits) | 77 |
| Social security (disability benefits) | 131 |
| Veterans pensions | 221 |
| Free school lunches | 8 |
| Medicare | 8 |
| Medicaid-payment for medical services | 14 |
| Medicaid-payment of medicare premium | 6 |
| Rent supplements | 55 |
| Neighborhood service center | <u>1</u> |
| Benefits, total | <u>\$691</u> |

D. A mother of 10 children in Mid-western City with 5 benefits:

| PROGRAM | AMOUNT PER MONTH |
|-------------------------------|---------------------|
| AFDC | \$616 |
| Food stamps | 110 |
| Free school lunches | 11 |
| Public Health services | 3 |
| OEO emergency health services | <u>53</u> |
| Benefits, total | <u>\$793</u> |

E. Elderly husband and wife in Rural Counties with 6 benefits:

| PROGRAM | AMOUNT PER MONTH |
|---------------------------------------|---------------------|
| Old age assistance | \$ 85 |
| Social security | 70 |
| Surplus commodities | 22 |
| Medicare | 372 |
| Medicaid-payment for medical services | 5 |
| Medicaid-payment of medicare premium | <u>6</u> |
| Benefits, total | <u>\$560</u> |

THE SYSTEM IS OFTEN UNFAIR

The public welfare "system" distributes benefits in a way that sometimes seems arbitrary. It can be more generous to one family than to another with the exact same income and size. Some of the poorest households receive little public aid.

Chart 5 illustrates two types of unfair situations with actual cases.

(102) The upper part of the chart compares two families of four in Eastern City. Because Household B is not eligible for Aid to Families with Dependent Children (AFDC), its average income and benefits are far lower than Household A's—even though the man's earnings are lower than those of the woman receiving AFDC.

The lower part of the chart shows two elderly couples in the Rural Counties site. Couple C has a small enough social security check that it also qualifies for welfare for the aged, called old age assistance. So it automatically qualifies for benefits such as surplus food commodities and medicaid which go along with public assistance in the Rural Counties site. Couple C had actual medical expenses averaging \$47 a month paid for by medicaid. Medicaid will pay for many medical expenses not covered by medicare. By virtue of having no more than \$10 "too much" social security, Couple D is ineligible for old age assistance, free food commodities, and free health care.

Chart 5. BENEFITS CAN BE INEQUITABLE

Male - Headed Households Can Get Less

Household A: Woman and 3 Children in Eastern City

| | |
|--|--------------|
| Earnings | \$355 |
| AFDC | 281 |
| Food stamp bonus | 46 |
| Public health | 32 |
| Total, average monthly income and benefits . | <u>\$714</u> |

Household B: Man, Wife, and 2 Children in Eastern City

| | |
|--|--------------|
| Earnings | \$346 |
| Unemployment insurance | 25 |
| Total, average monthly income and benefits . | <u>\$371</u> |

Public Assistance Can Confer an Advantage

Aged Couple C in Rural Counties

| | | |
|--|--------------|--------------------------|
| Social security | \$ 184 | |
| Old age assistance | 65 | |
| Surplus commodities | 33 | |
| Total, average monthly income and benefits . | <u>\$282</u> | + Medicaid + Medicare |

Aged Couple D in Rural Counties

| | | |
|--|--------------|---------------------------------|
| Social security | <u>\$259</u> | |
| Total, average monthly income and benefits . | \$259 | + Medicare only, No Medicaid |

HOW WELL OFF ARE HOUSEHOLDS RECEIVING BENEFITS FROM MANY PROGRAMS?

Households receiving many benefits do not always escape poverty. Chart 6 shows the effect that benefits have in reducing poverty for households participating in five or more programs.

The top bars show that if only the private incomes and none of the benefits of these households are counted, most beneficiaries, in fact, are poor.

After adding in cash benefits, 67 percent of the households in Southern City and 29 percent in Eastern City are still poor. This is shown in the second set of bars.

(#10) When food and housing benefits are added too, the percentage of these households in poverty is reduced to 31 percent in Southern City and 8 percent in Eastern City. Again, recipients are not likely to value these benefits as highly as cash.

Even if the Government costs of all benefits—such as health and other services—are added in as if they were income, some households are still poor. But some do very well. At two of the six sites, the five-benefit households had total private income and public benefits averaging over \$6,500 a year. These amounts clearly should not be equated with disposable income, however.

Since the typical recipient participates in more than one program and many recipients have earnings, it is not generally useful to evaluate the adequacy of individual programs alone. A broader look at all benefits and earnings is necessary.

Chart 6. EFFECT OF BENEFITS IN REDUCING POVERTY

For Sample Households Receiving 5 or More Benefits

HOW DO MULTIBENEFIT PACKAGES COMPARE TO MEDIAN WAGES?

Some low-income people receive no public welfare benefits; others only small amounts. But there are people who receive as much from welfare programs as they could earn in a full-time job and as much as their neighbors currently are earning.

Chart 7 examines the benefits received by a specific group in the sample: urban households with children, receiving five or more benefits, and having no earnings. Only their cash, food, and housing benefits are included here in order to compare only those benefits which can be assumed to be consumption items. Thus, benefits such as medical care, legal services, manpower training, and the like are excluded.

(106) The cash, food, and housing benefits of the households are compared to median wages for men and women in these low-income areas. Social security payroll taxes have been subtracted from the median wages, but work expenses and any Federal, State, and local taxes would reduce the median wages below the amounts shown. Of course, the benefits shown are tax-free.

Average benefits for this group exceed median wages for women in Eastern and Southern Cities and would exceed them in at least two of the three other sites after the wage earners paid taxes and work expenses.

Average benefits are significantly below men's wages only in Midwestern and Western Cities.

In addition to illustrating that combined public welfare benefits can be generous relative to wages, this chart highlights the low wage levels for persons in low-income areas. Especially for workers with family responsibilities, supplementation of low wages is necessary and is increasingly being provided—by means of food stamps in almost all counties of the Nation and, where the supply is adequate, by means of subsidized housing.

Chart 7. COMBINED MONTHLY TAXFREE BENEFITS COMPARED TO MEDIAN WAGES*

for 42 sample households with children, having
5 or more benefits and no earnings (Urban sites)

*Median monthly wages (after Social Security deduction only).
Families subject to Federal Income Tax would have lower net median wages than shown.

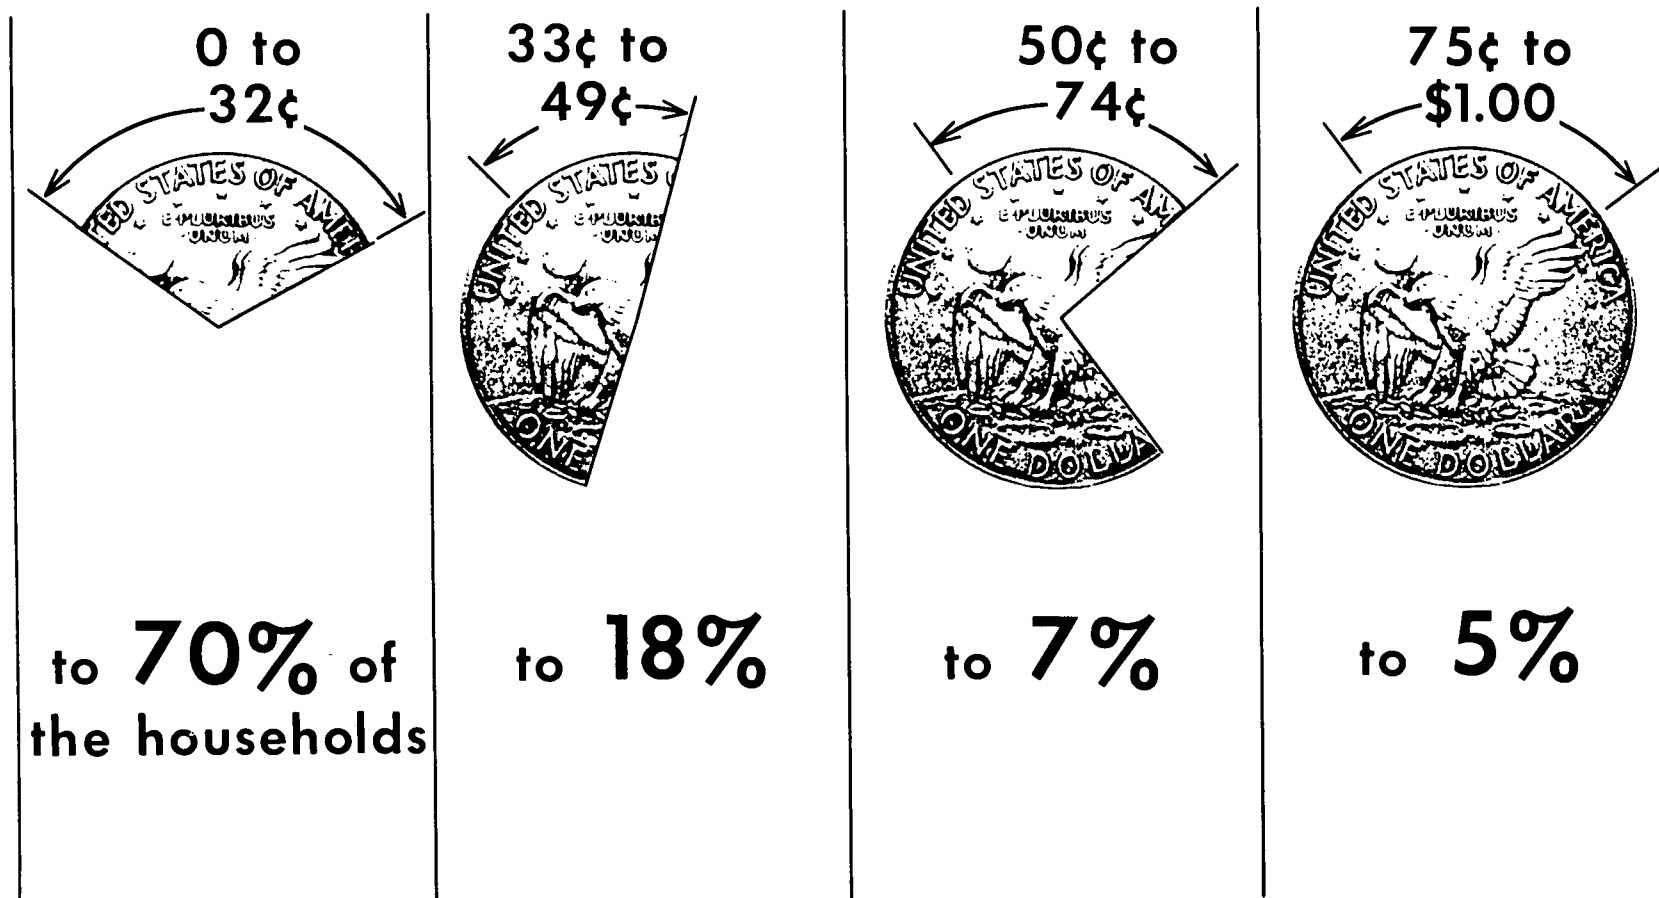

ARE RECIPIENTS OF MANY BENEFITS BETTER OFF IF THEY WORK?

(801) The structure of public welfare programs does not promote the reasonable objective that working should make people financially better off in every case. Working can leave recipients of several programs little better off—and sometimes *worse* off—because their benefits are reduced. After their benefits are reduced and after they net out work expenses and payroll taxes, recipients who go to work may see little change in their total income. The AFDC grant falls, more must be paid for the same amount of food stamps and the same public housing unit, and there are also payroll deductions.

Chart 8 shows the small gain that some beneficiaries would get from earning \$1 more. This group is composed of the 111 urban households with children getting five or more benefits. For 70 percent of these households, \$1 more in earnings will probably net them no more than 33 cents and as little as zero (or even a negative amount). Eighteen percent would gain from 33 to 49 cents on their added dollar, and only 5 percent would gain from 75 cents to \$1.

Chart 8. EARNINGS AREN'T ALWAYS PROFITABLE FOR BENEFICIARY HOUSEHOLDS

Of 111 sampled urban households with children receiving 5 or more Benefits, \$1 more in earnings would be worth. . .

DO AFDC HOUSEHOLDS HAVE EARNINGS?

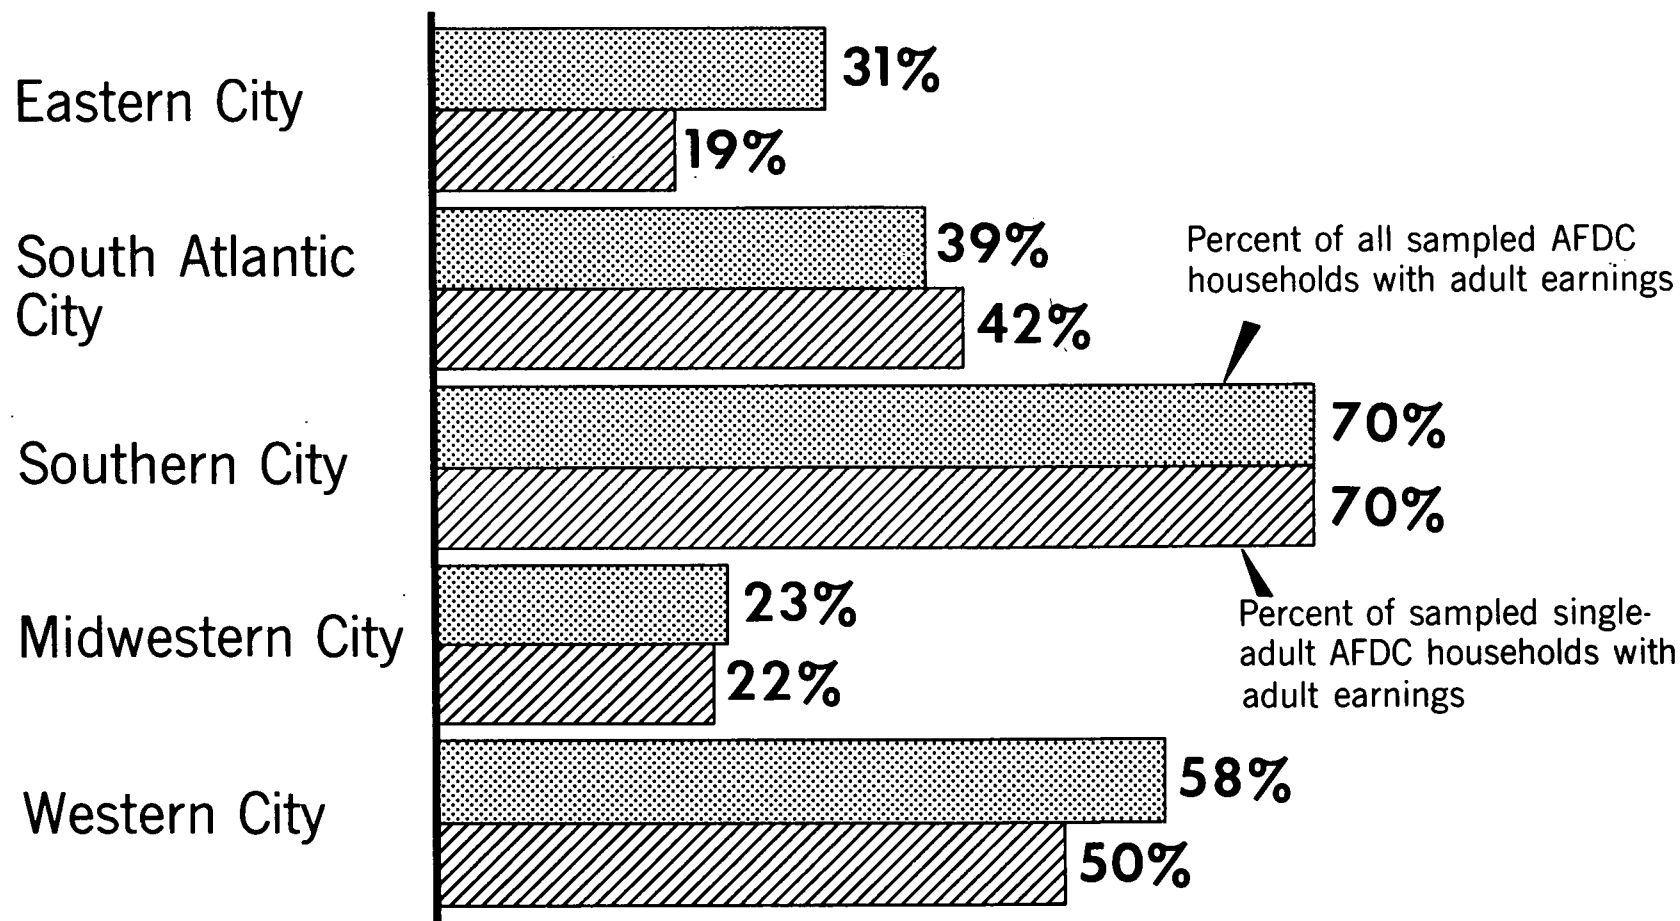

Many of the multibeneficiary households shown in charts 7 and 8 include AFDC cases. If AFDC recipients were either unemployed or unemployable, benefit levels and work incentive features of combined programs might seem unimportant. But many adults in AFDC households do work.

The first bar for each site in chart 9 shows the proportion of all AFDC households known to have adult earnings for some part of the year. From about one quarter to over two thirds of the urban AFDC households had earned income in addition to the AFDC grant for some portion of a year.

The second bar for each site shows the proportion of single-adult AFDC households which have adult earnings. The AFDC parent was known to have worked in from 19 to 70 percent of these households.

These facts indicate that the work incentive features of AFDC and other programs are important—and they are important for women heading families, too.

SOMETIME IN A YEAR**

THE ADMINISTRATIVE COMPLEXITY RESULTING FROM OVERLAPPING BENEFITS

(112) The existence of many programs helping the same group of people means that several agencies are checking on income and family circumstances, keeping records, mailing checks or paying vendors, and enforcing program rules while serving largely the same clientele.

Chart 10 shows the administrative complexity resulting from overlapping benefits. This is something of an extreme case—a nine-member household receiving benefits from ten different programs over the course of a year.
